

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Original): A color conversion layer comprising a fluorescent medium for converting light emitted from an emitting medium to light having a longer wavelength, and having a haze value of 50% to 95%.

Claim 2 (Original): The color conversion layer according to claim 1, comprising particles of an organic material and/or an inorganic material.

Claim 3 (Original): A color conversion layer comprising:
a fluorescent medium for converting light emitted from an emitting medium to light having a longer wavelength, and
particles of an organic material and/or an inorganic material coated with a material suppressing extinction of the fluorescent medium.

Claim 4 (Original): The color conversion layer according to claim 3 that has a haze value of 50% to 95%.

Claim 5 (Currently Amended): The color conversion layer according to ~~any one of claims 1 to 4~~ claim 1, wherein the fluorescent medium converts light in a blue range emitted from the emitting medium to light having a longer wavelength.

Claim 6 (Currently Amended): The color conversion layer according to ~~any one of claims 2 to 4~~ claim 1, wherein the particles of an inorganic material comprise an inorganic oxide, an inorganic nitride or an inorganic oxinitride.

Claim 7 (Original) The color conversion layer according to claim 6, wherein the inorganic material are a material selected from SiO_x , SiN_x , SiO_xN_y , AlO_x , TiO_x , TaO_x , ZnO_x , ZrO_x , CeO_x and ZrSiO_x wherein x is 0.1 to 2 and y is 0.5 to 1.3.

Claim 8 (Currently Amended): The color conversion layer according to ~~any one of claims 2 to 4~~ claim 2, wherein the particles of an organic material and/or an inorganic material are hollow.

Claim 9 (Currently Amended): The color conversion layer according to ~~any one of claims 1 to 4~~ claim 1, wherein a color filter is stacked.

Claim 10 (Currently Amended): The color conversion layer according to ~~any one of claims 1 to 4~~ claim 1, wherein the color conversion layer is a layer in which a material of the fluorescent medium and a material of a color filter are mixed.

Claim 11 (Currently Amended): A luminescent device comprising:
the color conversion layer according to ~~any one of claims 1 to 4~~ claim 1, and
an emitting medium.

Claim 12 (Original): The luminescent device according to claim 11, wherein the emitting medium is a light emitting diode.

Claim 13 (Original): The luminescent device according to claim 11, wherein the emitting medium is an electroluminescent device.

Claim 14 (Original): The luminescent device according to claim 11 that emits white light.

Claim 15 (Original): A display comprising a screen comprising the luminescent device of claim 11.

Claim 16 (New): The color conversion layer according to claim 2, wherein the fluorescent medium converts light in a blue range emitted from the emitting medium to light having a longer wavelength.

Claim 17 (New): The color conversion layer according to claim 3, wherein the fluorescent medium converts light in a blue range emitted from the emitting medium to light having a longer wavelength.

Claim 18 (New): The color conversion layer according to claim 4, wherein the fluorescent medium converts light in a blue range emitted from the emitting medium to light having a longer wavelength.

Claim 19 (New): The color conversion layer according to claim 3, wherein the particles of an inorganic material comprise an inorganic oxide, an inorganic nitride or an inorganic oxinitride.

Claim 20 (New): The color conversion layer according to claim 4, wherein the particles of an inorganic material comprise an inorganic oxide, an inorganic nitride or an inorganic oxinitride.

Claim 21 (New): The color conversion layer according to claim 3, wherein the particles of an organic material and/or an inorganic material are hollow.

Claim 22 (New): The color conversion layer according to claim 4, wherein the particles of an organic material and/or an inorganic material are hollow.

Claim 23 (New): The color conversion layer according to claim 2, wherein a color filter is stacked.

Claim 24 (New): The color conversion layer according to claim 3, wherein a color filter is stacked.

Claim 25 (New): The color conversion layer according to claim 4, wherein a color filter is stacked.

Claim 26 (New): The color conversion layer according to claim 2, wherein the color conversion layer is a layer in which a material of the fluorescent medium and a material of a color filter are mixed.

Claim 27 (New): The color conversion layer according to claim 3, wherein the color conversion layer is a layer in which a material of the fluorescent medium and a material of a color filter are mixed.

Claim 28 (New): The color conversion layer according to claim 4, wherein the color conversion layer is a layer in which a material of the fluorescent medium and a material of a color filter are mixed.

Claim 29 (New): A luminescent device comprising:
the color conversion layer according to claim 2, and
an emitting medium.

- Claim 30 (New): A luminescent device comprising:
the color conversion layer according to claim 3, and
an emitting medium.

- Claim 31 (New): A luminescent device comprising:
the color conversion layer according to claim 4, and
an emitting medium.
